II. PROJECT DESCRIPTION

Summary

The Town of North Haven is seeking proposals from qualified consultants to provide an overview of our current radio systems, identify future functional and performance requirements, make recommendations on upgrade/replacement strategies, and oversee the installation of the chosen replacement system.

The Town of North Haven has a land area of approximately 21 square miles and a population of approximately 24,000. It is bordered by five other incorporated municipalities and both Interstate 91 and the Merritt Parkway pass through Town. Radio communications are crucial to the day-to-day operations of both the North Haven Police Department and the North Haven Fire Department. The Department of Public Works and the North Haven Public School system utilize radios in their day-to-day operations.

The North Haven Police Department serves as the communications center and dispatches both police and fire calls for service. The center is a three position Public Safety Answering Point (PSAP). The current radio system is composed of Motorola products that were installed and maintained by Utility Communications located in Hamden, CT. The system has aged and a large portion of the components are approaching or exceeded useful life expectancy. Portions of the current system infrastructure will be supported by Motorola through 2018 at which time support for the majority of the components will be discontinued. Existing Motorola brand HT1250 portable radios and mobile radios used by both police and fire are in need of replacement. The following is an overview of some of the current radio assets:

• (145) Motorola HT1250 Portable Radios
• (87) Motorola CDM1250 mobile radios
• (13) Motorola Astro-TAC receiver systems
• (3) Motorola Spectra-TAC comparator systems
• (4) Motorola base station systems
• (5) Motorola control station systems
• (8) Motorola tone remote controller systems
• (3) Zetron console operator position systems
• (1) Zetron console common electronics system
• (1) Zetron station alerting system for firehouse alerting
• (120) Motorola pagers and chargers

The radio system also includes the following repeater locations:

• Ridge Road Elementary School, 1341 Ridge Road, North Haven, CT.
• Quinnipiac University North Haven Campus, 370 Bassett Road, North Haven, CT.
• Cinemark Theatre, 550 Universal Drive North, North Haven, CT.
• Regional Water Authority, Peter’s Rock Water Tank, 3 Horseshoe Hill Road, North Haven, CT.

The scope of the replacement radio system project will also include assessing whether or not to have the Public Works Department remain on their current platform or include in the upgrade to the new
system. Additionally, the Town will explore the option of connecting the school system to the new radio system to establish interoperability with Police and Fire and between the schools and administrative offices. The North Haven Public School system includes a High School, Middle School and four Elementary Schools. School staff utilizes radios for daily functions and events. The radios and associated components are of varying ages and makes and models. The current systems have limited range and do not allow for school to school transmissions.

III. SCOPE OF WORK

1. Meet with current vendors and public safety officials to assess current conditions and develop understanding of public safety communications needs for the Town.
2. Meet with North Haven School System representatives to address their existing radio system and explore connectivity to the proposed new system.
3. Make sufficient site visits to adequately assess existing infrastructure.
4. Explore possibilities for enhanced interoperability with neighboring public safety entities and seek to leverage any existing regional infrastructure.
5. Attend meetings with staff and vendors as necessary to perform sufficient analysis, and review and present findings.
6. Make recommendations relative to replacement of existing radio systems.
7. Present current technology options and provides summary of potential use of different technologies, inclusive of both voice, video and data requirements.

9. Review vendor prepared radio coverage maps and coverage predictions.
10. Attend public meetings to address technical questions that may arise.
11. Participate in the design of any and all structures needed to house communication equipment associated with this project.
