221 Elm St, North Haven**

When : March 15, 2016 6:30 – 8:00 pm

This presentation is for parents only

INTERNET SAFETY CONCEPTS
Empowering Smart Online Choices

Press Release:

Can the Internet harm your child or family?

The Internet, smart phones and other devices are common communication tools for children and teens today, but students and parents may be unaware of the potential trouble that could result from misuse. From texting inappropriate pictures, posting items on social networking sites that become permanent, cyber bullying or communicating with people over mobile apps, people can drop their guards on safety and may not realize how much of our lives we are sharing.

On March 15, 2016 Scott Driscoll of Internet Safety Concepts will be at North Haven High School to give a presentation to parents to educate the parents on today's latest trends in technology and ways they can keep their families safe. This presentation will run from 6:30 to 8:00 pm and is for PARENTS ONLY.

Mr. Driscoll has over 26 years of police experience and for the last decade has been a leader in the education of Internet and technology safety. Through his presentations and his book, "*www.R U In Danger.net*" (a must read for families illustrating the possible negative impacts of technology use and ways to prevent problems), Scott has educated thousands on how to make smart online choices and be safe. Scott's interactive presentation is designed to heighten student and parent awareness of what could happen if we do not think about safety when using technology. Whether it is social networking, text messaging, sexting, or cyber bullying, these presentations will help everyone understand how to use technology in a safe and respectful manner.
